

CASE STUDY GRAIN TRAY

Grain-tray: 4 years in use at the beautiful Corda Cuisine (Hasselt, Belgium)

The trendy self-service restaurant of the Corda Campus focuses on daily fresh products. It uses stylish, high-quality materials for its interior. With Roltex's Grain, it extends this into its trays.

"WE PREPARE UP TO A THOUSAND MEALS A DAY. THE TRAYS ARE USED VERY INTENSIVELY, BUT THE CUSTOMER DOESN'T NOTICE"

Customer Robbe Vocaet: appreciates the choice of the Grain tray:

"The trays are immediately recognisable because they have the Corda logo. They really fit in with the interior. Corda Cuisine pays attention to the details, I really appreciate that. An example for other catering businesses."

You want to make a good first impression on your customers. But a worn-out tray doesn't make your customer happy. What's more, they immediately get the wrong idea about the quality of your restaurant. That's why Roltex produces durable trays that match your concept.

Peter Delanoy, facility manager at Corda, explains:

"In a self-service restaurant, it is important that the trays can take a beating. Our concept is about delicious healthy food, but also about cosy dining. So no boring trays here, but nice and personalised trays. Even after four years, the trays are still in perfect condition. And that's how it should be! In addition, information about the other Corda hospitality businesses is printed on it. That's how customers find their way there too."

EPIQ CATALOGUE

We are delighted to announce that the first edition of the EPIQ catalogue is to be launched in September 2019

This is the combination of all member products and showcases the wide range of quality, innovative products manufactured in Europe. There are over 250 pages of products designed to give you and your customers the competitive advantage.

With such a wide range of recyclable, environmentally friendly, reusable products, why go elsewhere? Contact your local EPIQ partner today to reserve your copy. Alternatively email info@epiq.pro to be one of the first to get their hands on a copy.

THE DAILY EPIQ

EDITION 02 / SUMMER

SWEDEN: GREEN LOOP SYSTEM LAUNCHED – FOR THE NEXT GENERATION

Ecology and sustainability major in the principal foundations central to EPIQ and its members. We are constantly looking for new innovative, eco-friendly materials and ways to minimise our production waste. Education and product training are the other corner stones where we spend a lot of effort in helping our customers be more environmentally conscious.

This year sees us proud to present the next step in our environmental work, which is the Green Loop System by August Lundh.

The waste situation

The plastics situation quite rightly is a heavily debated topic. In Sweden today only 42 % of all plastics material is recycled. Within the EU the numbers are even lower, a mere 30 % of all plastics gets recycled, meaning that 70% of potential new material is incinerated or goes to landfill.

Through the introduction of a closed loop system, we as a producing company take full responsibility of our own products, throughout the entire process. MALKO® plates are well-known classic tableware range used throughout the Education and Public sectors in Sweden and Scandinavia. The plate range is known for its high quality and long life span. However, until now, it has been up to the customer to handle the plates once their life cycle is over.

"THE SYSTEM HAS AN EFSA (EUROPEAN FOOD SAFETY AUTHORITY) PENDING APPROVAL"

Today, though the Green Loop System, we as a company offer a new solution. Plastic is a material that can be re-used over and over again. We are now taking full advantage of this by literally closing the loop.

Eating green has never been easier

By recycling the same plates through a closed loop system, we offer our customers a premium sustainable solution. The Green Loop plate will look and feel just like a regular MALKO® plate, with the difference that it is 100 % recycled.

Once the plates lifespan is up, the plates will be returned to our production. There it will be milled and produced into new plates. Your customers will not be left without a tableware solution, as new plates already will have been sent out through our clever rental system.

The benefits of the system is not only environmental through reduced carbon dioxide emissions and waste, it also means a more stable and controlled economy flow. The system has been well tested and has an EFSA (European Food Safety Authority) pending approval.

Stronger together

The environment threat that we are facing is not one we take lightly. The Green Loop System is one out of many solutions that the EPIQ partners now offer through our own Ecological agenda.

ABOUT EPIQ

Production with an eye for quality

EPIQ is an association of European producers with innovative and qualitative catering products. The group joins forces under EPIQ: 'European Partners In Quality', where we stand together for European production, socially responsible entrepreneurship, smart design and ecological choices.

THE GREENER TABLEWARE SOLUTION

Harfield have recently added to their greener tableware range with new lids for their Dessert Pot and MultiPot. They want to help you make a difference by encouraging the use of their 100% recyclable, reusable tableware over the use of disposables and non-recyclable plastics such as melamine.

The MultiPot and Dessert Pot are very popular with all their customers from education to healthcare to HORECA. The MultiPot is designed for salads, pasta, rice dishes, soup and fruit and the Dessert Pot is ideal for layered desserts, savoury dishes and snacks. They are an ideal replacement for disposables and the new lids now mean the pots can be stacked and can be prepared in advance.

Harfield, the greener tableware solution.

Rack that suits your needs

Warewashing is an essential key point in every professional kitchen. CWK dish racks are exceptional during this process. With its lasting quality, they provide strong and sturdy handling, perfect for all kinds of kitchenware. They will assist you in keeping porcelain, cutlery and all kinds of kitchen tools clean and ready.

Combine your dish racks with a CWK hold-down grid for light-weight dish, which will prevent the goods from flipping while machine is running.

"CWK DISH RACKS PROVIDES STRONG AND STURDY HANDLING"

Plastico Celebrity Polycarbonate Glasses

The Celebrity Polycarbonate Range from Plastico is a versatile, stylish and durable range of glasses that suit many applications...from Schools and Kindergartens to Hospitals and Healthcare and Bars & Restaurants... they can even be used for appetisers.

The Polycarbonate material is very durable and has great impact resistance, it has also been tested for commercial dishwashers and we recommend you will get at least 300 uses. Polycarbonate is also recyclable.

Celebrity is available in Clear as standard colour but is also available in Black & White as a special order.

Euronorm Isothermic Tray System with Optional Polycarbonate Tableware Set

The Euronorm isothermic tray system is made up of a cover and base and is manufactured in food contact safe polypropylene. Dishwasher safe and extremely durable, the Euronorm conforms to the Euronorm 1/1 Standard of 530 x 370 x 110mm. They can withstand a maximum temperature of 100°C and a minimum temperature of -40°C. The interior insulation is made of high density PUR ECO without CFC. The trays are available in green and grey or blue and grey.

The Euronorm trays are stackable and equipped with enclosed areas around the dish and container compartments to avoid odour escape and temperature loss during transportation. The food containers can be easily removed from the trays due to the indentations. There is also space for medication to be stored in the base and a place for silverware. There is also a specific place where you can put a menu card or our card holders.

This is the only tray systems that fits two 225mm plates as well as three types of lidded bowls and dishes plus cutlery.

Tray patented, specially designed for use in hospitals and manufactured according to Regulation (UE) 2015/174, (UE) 2016/1416 that modifies Regulation (UE) 10/2011 and Directive 2002/72/CE, Regulation (UE) 2018/213, Regulation (CE) 135/2004, and (CE) 2023/2016 about good manufacturing practice.

Keep it cool with the August Lundh drink dispensers

Keep your beverage cold temperature even throughout service with the Malko drink dispenser!

The drink dispenser is a cost effective way to serve cold drinks. Stable, durable and easy to disassemble and clean, this makes the drink dispenser a perfect assistant to any function. The drink dispenser is available in 8L and 20L and the bases comes in different variations. The base can also be customised for a unique look.

Wireless and portable, the drink dispenser is easy to handle for both staff and users. The integrated chiller element keeps the temperature down on a hot day, and can be re-used over and over again.

Protect your counters and serving area from stains and damage and keep your shakers, mixing glasses and tools off the bar with the bar and service mat. Perfect for preparing your impressive cocktails and bar food and for displaying your glassware in a professional, elegant and safe way. Non slip and easy to clean. The material is PVC and the colour is black.

S-plank & S-cube

The Roltex S-plank is a delight to behold. Made from unbeatable polyester with a natural look. The textured surface keeps the tray's culinary delights firmly in place. And you can add a personal touch to your establishment. Round, square, oblong or a stone shape? Choose your own format and design. For extra stability, small feet can be added so it is easier to lift the platter.

Building your buffet

Are you ready for the next step? Discover the revolutionary buffet display solution. Combine your S-Plank with S-Cubes and create an amazing buffet. Let your imagination run free, build high or low, there is no limit to what you can build with the S-Cubes.
