

MORE THAN TABLEWARE, A TRUSTED SOLUTION

A stronger story on safety,
value and sustainability.

QUALITY TABLEWARE SINCE 1961

SAFE, SUSTAINABLE TABLEWARE, BUILT TO LAST. HARFIELD IS THE RIGHT CHOICE.

Why choose Harfield?

Reusable, not disposable

Designed to last, helping keep plastic out of landfill and our oceans.

Made in the UK & Europe

Shorter supply chains mean fewer transport miles, lower emissions and shorter lead times.

Less waste, less packaging

Reduce waste with 100% recyclable packaging.

Order only what you need

Mix and match colours and products to reduce stock, storage space and expense.

Built to last

A long-lasting investment that delivers excellent value for money.

We'll recycle it

When your Harfield polycarbonate or copolyester tableware reaches the end of its life, we'll recycle it free of charge.

If sustainability matters, choose the genuine option

A product that breaks easily, is shipped from overseas and cannot be recycled is not a sustainable choice.

**Harfield products are reusable, recyclable,
made in the UK and designed to last.**

A greener tableware solution you can believe in

WHY THE MOVE TO COPOLYESTER IS RIGHT FOR YOU

Material comparison table

This table is a guide to the different properties of the most popular tableware materials

	Tritan Copolyester	Polypropylene	SAN	Melamine	Crockery	Glass
Virtually unbreakable	Yes	No	No	No	No	No
Splinter & shatter proof?	Yes	No	No	No	No	No
Dishwasher safe	Yes	Max Temp 65°C*	Max Temp 65°C*	Yes	Yes	Yes
Microwave safe	Yes	Yes	NOT SAFE *	NOT SAFE	Yes	Yes
Stain Resistance	Very Good	Below Average	Average	Average	Average	Excellent
Recyclable	Yes - Specialist	Yes	No	No	No	Yes
Lifespan	Excellent	Average	Average	Good	Average	Average
Sustainability	Excellent	Excellent	Poor	Poor	Poor	Excellent
Maximum Temperature	110°C	100°C*	95°C*	120°C*	200°C*	*
Minimum Temperature	-40°C	-20°C*	-20°C*	-20°C*	*	-20°C*
BPA Free	Yes	Yes	Yes	Yes	Yes	Yes
Formaldehyde Free	Yes	Yes	Yes	No	Yes	Yes
Safe for use in secure environments	Yes	No	No	No	No	No

* Check the manufacturers guidelines

** With correct detergents & dosages

Crockery and glass are not suited for extreme changes in temperature such as going from freezer to oven, or oven to cold work top.

The above table is only a guide to aid in the selection of material for your tableware. There are many variables within each material type, such as raw material quality as well as quality of the finished product.

Harfield has been supplying trusted, high-performance tableware to education, healthcare and catering customers for decades, and we are fully prepared for the regulatory changes ahead. We have already planned and implemented a controlled transition to BPA-free materials, secured our supply chains, aligned our product development with future standards, and scheduled new stock deliveries well in advance of any implementation dates.
